

## GREEN NATION SOLAR ENERGY

### JOB DESCRIPTION

#### Job title – Solar Asset Manager

Location: Bath-Shepton Mallet area

Contract: Permanent role

Hours: Full time

#### About Green Nation

Over the past six years Green Nation has developed seven solar farms and worked with hundreds of owners to put solar on houses, schools and commercial buildings, generating millions of kilowatt hours of electricity.

We now manage nine solar farms and several hundred rooftops ensuring every site generates the maximum amount of power that it can.

We are still growing and expanding our base in the UK, so we are constantly looking out for new sites to develop and existing sites to acquire. We are also investing time in developing other energy technologies, and developing our interests outside the UK.

#### The role

As our portfolio expands, we need to grow our asset management team.

We are looking for an experienced solar asset manager with a strong practical and technical focus.

The role will cover both solar farms and rooftop systems. The main focus will be on ensuring that existing sites perform to the highest possible level, and selection and oversight of technical contractors. It will also include supervision of new-build contracts.

#### Person specification

The successful candidate will need to demonstrate experience of:

- Dealing with O&M contractors and subcontractors
- Assessing performance information and acting on it
- Working under time pressure, managing multiple projects simultaneously with competing priorities
- Being great at problem solving and staying calm under pressure
- Taking ownership of issues and projects

To that end you will be:

- Energetic, intelligent and self-starting.
