# Welsh Government policy context

## Llywodraeth Cymru cyd-destun polisi

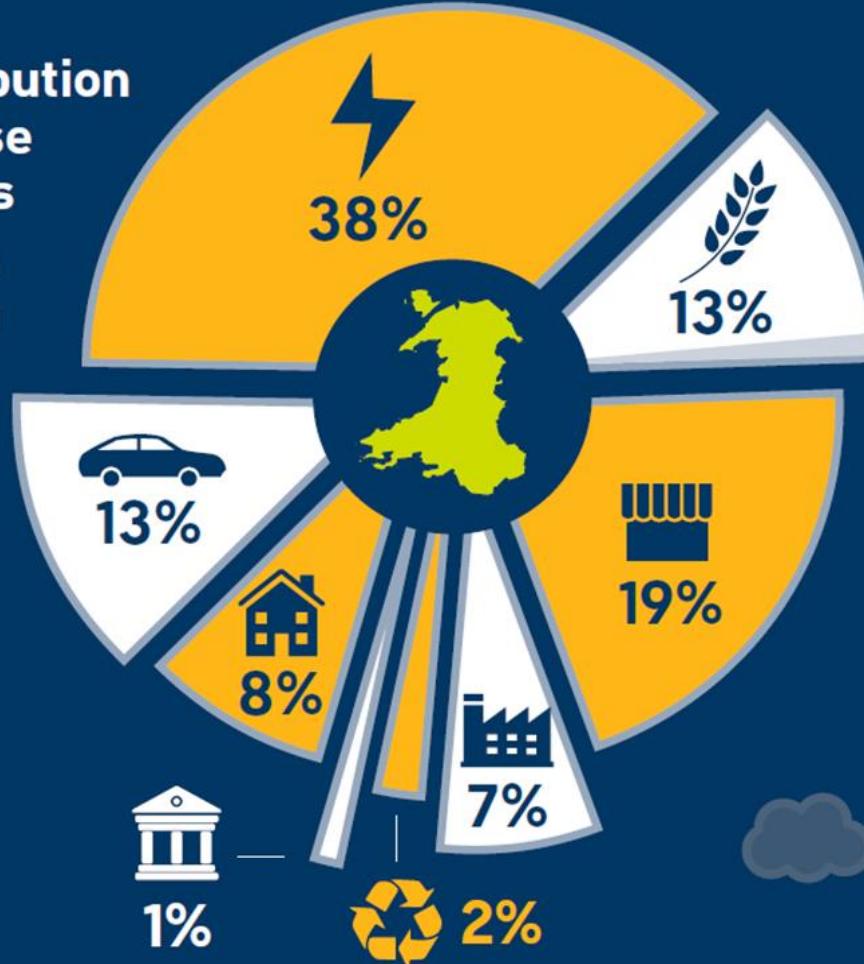

## Wales' commitment to tackling climate change

## Ymrwymiad Cymru i fynd i'r afael â'r newid yn yr hinsawdd

### Sector contribution of Green House Gas Emissions

Cyfraniad y Sector o safbwyt Allyriadau Nwyon Tŷ Gwydr

Total Agriculture emissions in 2015 amounted to 13%. Welsh sinks (e.g. forestry) removed 1% emissions, therefore, net Welsh emissions from Agriculture were 12% for 2015.

Roedd cyfanswm allyriadau yn 2015 gyfwerth â 13%. Roedd dalfeydd Cymreig (e.e. coedwigaeth) yn lleihau'r allyriadau 1%. O'r herwydd allyriadau net Cymru ar gyfer 2015 oedd 12%.

# **Lesley Griffiths AC/AM**

**Ysgrifennydd y Cabinet dros Ynni,  
Cynllunio a Materion**

**Cabinet Secretary for Energy,  
Planning and Rural Affairs**

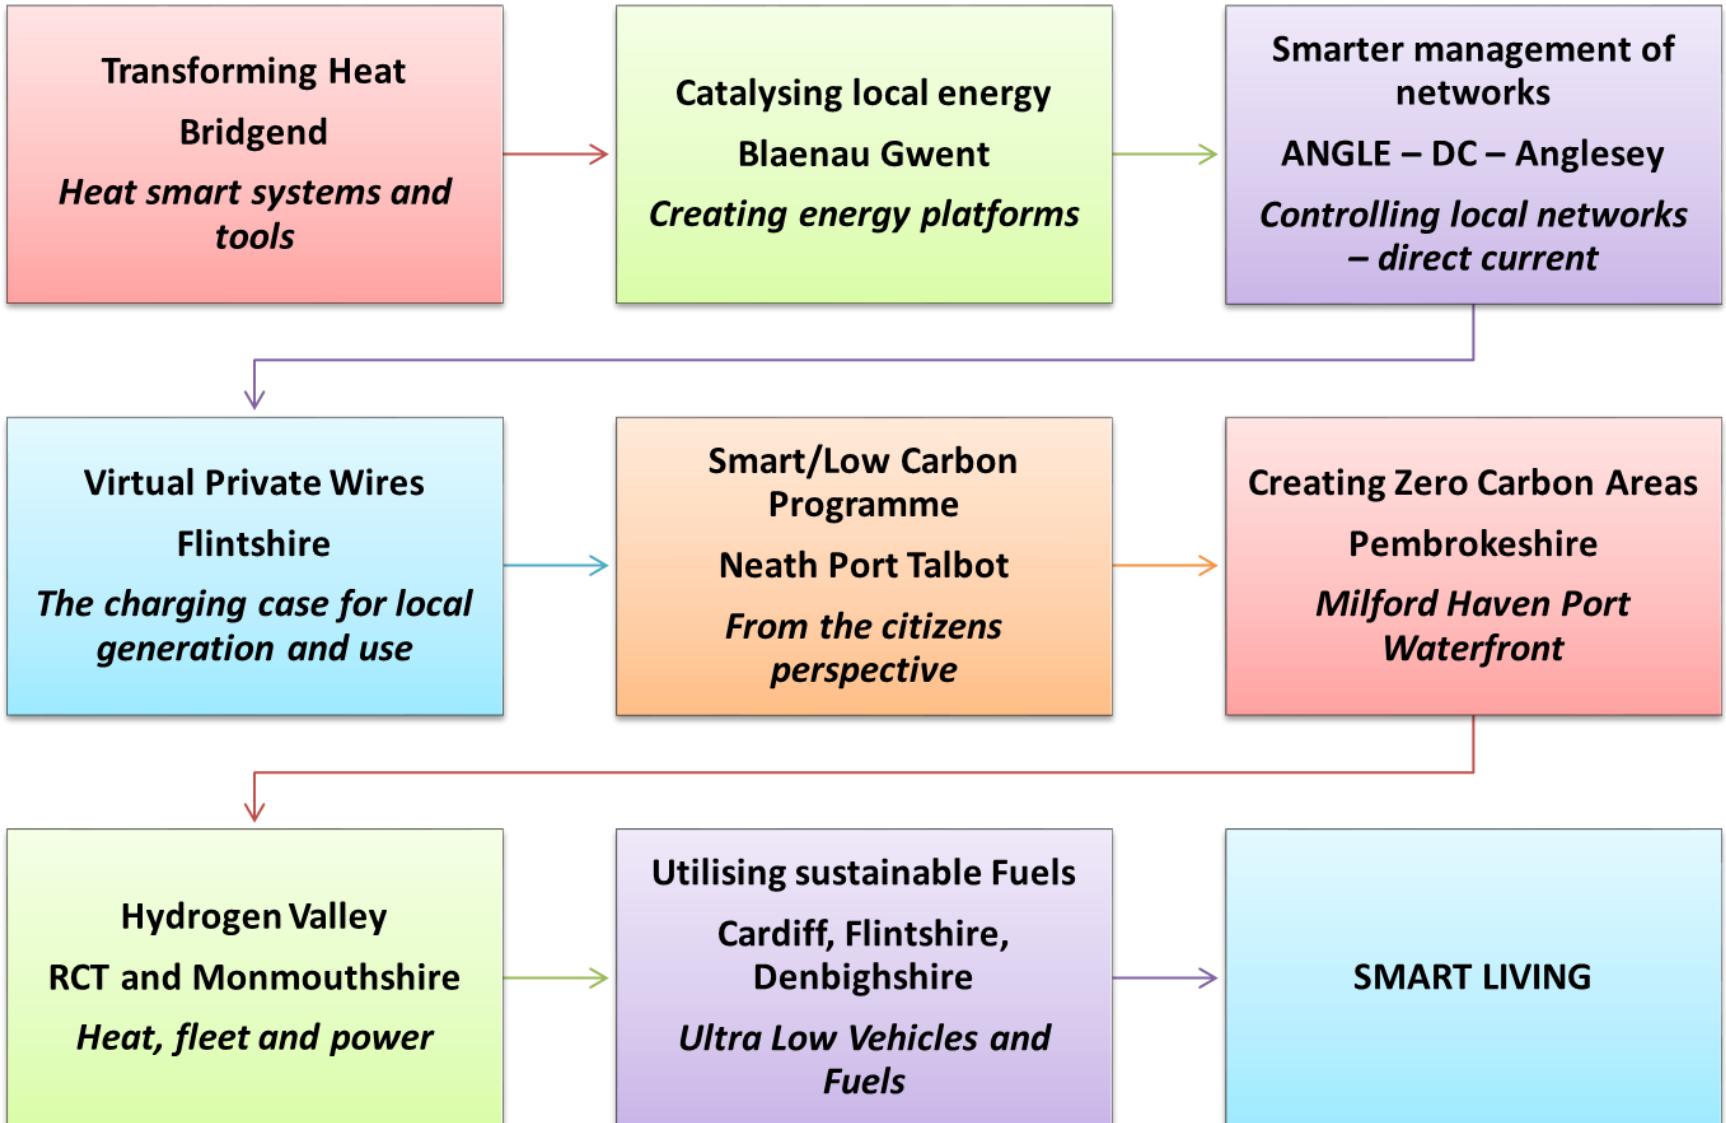

Defnyddio ynni yn fwy effeithiol	To use energy more efficiently
Sicrhau ein bod yn llai dibynnol ar ynni sy'n dod o danwydd ffosil	To reduce our reliance on energy generated from fossil fuels
Rheoli'r newid i economi carbon isel	To actively manage the transition to a low carbon economy

<b>Targedau Ynni</b>	<b>Energy Targets</b>
Bydd Cymru yn cynhyrchu 70% o'r trydan mae'n ei ddefnyddio trwy ddefnyddio ynni adnewyddadwy erbyn 2030.	Generate 70% electricity consumption from renewable energy by 2030.
Bydd un gigawatt o gapasiti ynni adnewyddadwy o dan berchnogaeth leol erbyn 2030.	1 GW renewable electricity capacity locally owned by 2030.
Bydd gan brosiectau ynni adnewyddadwy newydd o leiaf un elfen o berchnogaeth leol erbyn 2020	New renewable energy projects to have at least an element of local ownership by 2020.

# Ynni Adnewyddadwy o dan Berchnogaeth Leol Cais am Dystiolaeth

Locally owned renewable energy  
A call for evidence

## **Ein nod**

- Casglu dystiolaeth ynghylch sut y gall cynhyrchu ynni adnewyddadwy sicrhau buddion ar gyfer Cymru a rhannu'r buddion hyn mewn modd mwy cyfiawn.
- Ein nod yw defnyddio'r cais am dystiolaeth i helpu i nodi'r heriau y bydd n rhaid i ni gyd eu trechu er mwyn llwyddo i gynhyrchu rhagor o ynni adnewyddadwy o dan berchnogaeth leol a chydberchnogaeth.

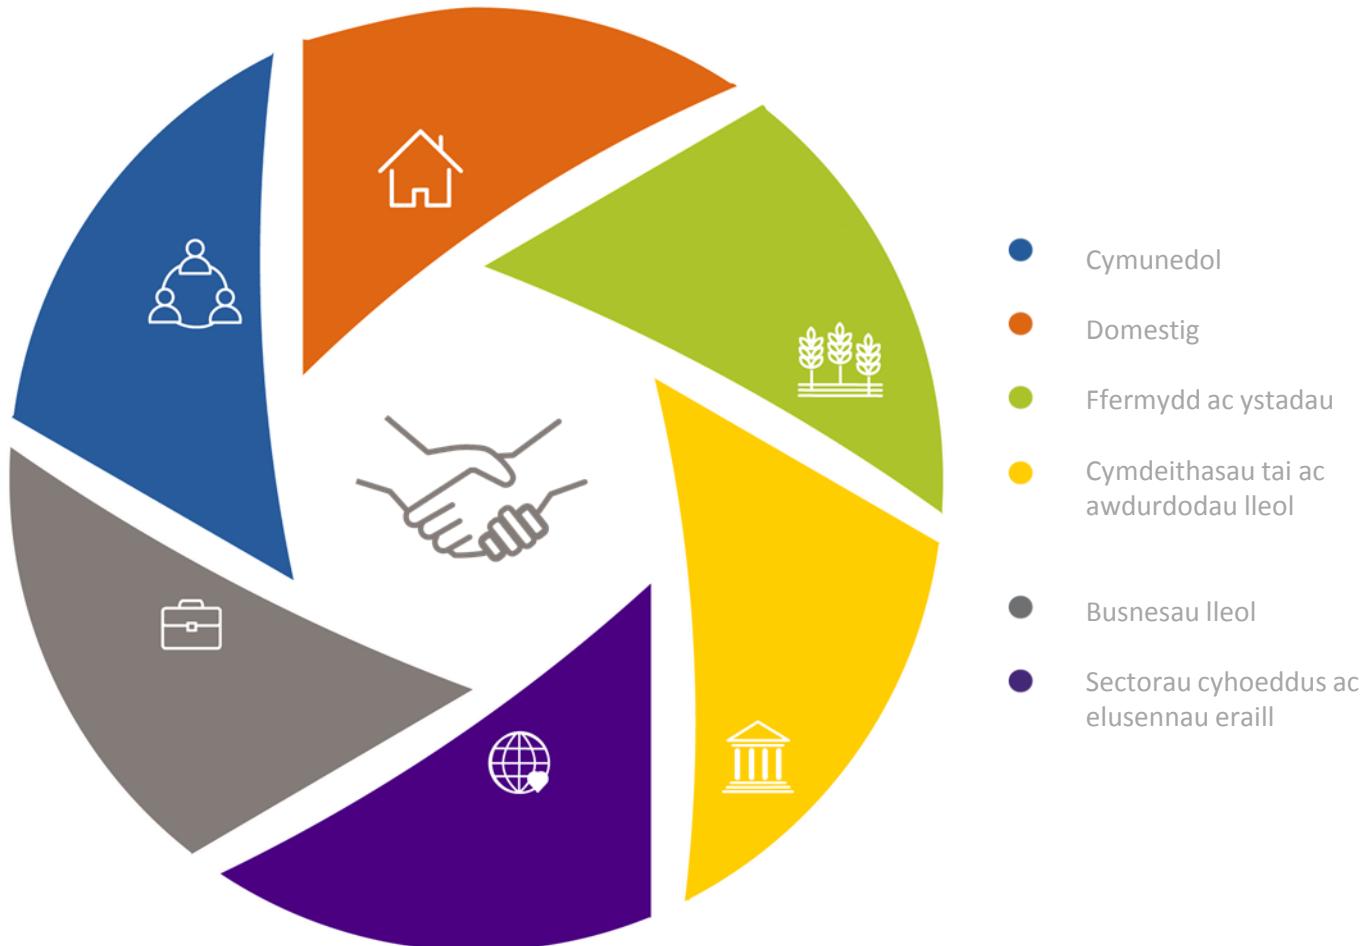

## **Our aim**

- Secure benefits for Wales and spread this benefit in a more equitable way.
- Use the call for evidence to help identify the challenges we all will need to overcome to deliver more renewable generation in local and shared ownership.

# Beth yw perchnogaeth leol?

## What is local ownership?

- Community
- Domestic
- Farms & estates
- Housing associations & local authorities
- Local business
- Other public sector & charity

## **Perchnogaeth gymunedol**

Ein diffiniad ni o osodiad cymunedol yw datblygiad ynni a leolir yng Nghymru sydd yn hollol o dan berchnogaeth menter gymdeithasol ac y mae ei enillion yn ymrwymedig mewn cyfraith i gyflawni amcanion cymdeithasol a/neu amgylcheddol yng Nghymru.

## **Cydberchnogaeth**

Diffiniad cydberchnogaeth yw prosiect sydd o dan berchnogaeth mwy nag un endid cyfreithiol.

## **Community Ownership**

We define a community installation as an energy development located in Wales which is wholly owned by a social enterprise whose assets and profits are legally committed to the delivery of social and/or environmental objectives in Wales.

## **Shared ownership**

Shared ownership is a project owned by more than one legal entity.

## Porth Partneriaeth

Dyluniwyd y Porth Partneriaeth er mwyn galluogi sefydliadau a grwpiau cymunedol i gydwethio i ddatblygu prosiectau ynni adnewyddadwy.

Nod y Porth Partneriaeth yw cynorthwyo perchenogaeth gymunedol o brosiectau ynni adnewyddadwy. Gall grwpiau cymunedol ddefnyddio'r Porth i bostio gwybodaeth ynglŷn â'u prosiect, a gall gael ei ddefnyddio gan ddarpar bartneriaid neu fuddsoddwr sy'n awyddus i gefnogi prosiect yn eu hardal, a gan gynnlluniau ynni adnewyddadwy cymunedol presennol sy'n fodlon rhannu eu profiadau a chynnig cymorth cyfoedion.

## Partnership Portal

The Partnership Portal is designed to enable organisations to work together to progress renewable energy projects.

The Partnership Portal aims to support community owners of energy projects. The Portal can be used by community groups to post information about their project, by potential partners or investors who would like to support a project in their area, and by existing community-scale renewable energy schemes who are willing to share their experiences and offer peer support.

You are welcome to post information in Welsh or English. Your post will then appear on the Welsh or English website depending on your language choice. To appear on both websites, you are welcome to submit your post
