

## Electric vehicles and electricity system forum

18 September 2018

15.00 - 18.00

Burges Salmon, 6 New St Square, London, EC4A 3BF

This new forum aims to bring together organisations engaged in the electric vehicle revolution with those involved in the electricity system as an opportunity for discussion, networking, and collaboration. Building on Regen's paper on "[Harnessing the Electric Vehicle Revolution](#)", the forum will focus on the opportunities for electric vehicles to contribute to a smarter, more decarbonised energy system.

The first meeting will focus on the development of charging infrastructure, including OLEV grant programmes, investment opportunities and challenges of connecting to the electricity network.

### Agenda

15.00 Registration, tea and coffee on arrival

15.15 **Welcome and introductions**

Merlin Hyman, director, Regen

Liz Dunn, partner, Burges Salmon

15.30 **Road to Zero Strategy and Investment in Charging Infrastructure**

Nick Brooks, head of energy, OLEV

16.00 **Panel discussion on the impacts and challenges on EV charging infrastructure on the network**

Robert Evans, CEO, Cenex

Belinda Littleton, group strategy and National Grid Ventures, National Grid

Matt Allen, CEO, Pivot Power

Sara Sloman, principal sustainable travel and road safety office, North Somerset Council

Ed Barratt, director – transport sector, Burges Salmon

Ian Cameron, head of innovation, UK Power Networks

### Discussion

17.30 **Refreshments and networking**

18.00 **Finish**
