

Sustainability, Safety and Supply Chain Working Group

13:00 – 14:30, 14 January 2021

Agenda

Chair: Catalina Rozo, regulatory analyst, Zenobe

13:00 **Introductions from chair**

13:10 **Fire safety – lessons learned and actions the ESN can take**

To discuss within the group what lessons can be learned from fires in the UK and abroad, building on the presentation from the speaker at the previous meeting, Electric Power Research Institute (EPRI)

- *What actions can should be taken in the industry to follow good safety practice, prevent fire, and create confidence in the safety of storage facilities/assets?*
- *What actions can the ESN take, what should we be pushing industry and government to do and what information can we disseminate to achieve the above?*

Reading: presentation from [Electric Power Research Institute](#) at previous working group meeting

13:50 **Sustainability of the mineral supply chain**

Following the presentation from the Fair Cobalt Alliance at the previous meeting, this working group will discuss the potential for ESN involvement in the FCA and future work on the mineral supply chain.

- *Could the ESN sign up to be a member of the Fair Cobalt Alliance and could this help the ESN/industry be a part of supply chain solutions?*
- *What research needs to be done by the ESN to understand the industry's impact on the mineral supply chain and start to look at what solutions/actions could be taken by ESN/industry?*
