

Electricity Storage Network

Membership

The Electricity Storage Network (ESN) is a membership organisation working to unlock the role of electricity storage in accelerating the transition to a zero carbon energy system. Together, we drive change in policy and regulation to support the development of the storage industry within the UK.

The ESN represents a broad range of members, including electricity storage manufacturers and suppliers, project developers, electricity network operators, consultants, academic institutions, and research organisations.

Our membership is a dynamic force sparking change at the cutting edge of the energy system. Join us and invest in a zero carbon future.

Have influence

- ▶ Gain a stronger voice with BEIS, Ofgem, National Grid ESO and other key players on issues affecting the deployment of electricity storage and the role flexibility plays in the overall system.
- ▶ Contribute to our policy positions and shape the policy agenda through our working groups and forums.

Get connected

- ▶ Increase your representation in the industry and access our targeted networking opportunities through our exclusive events and working groups.
- ▶ Showcase your business and raise your profile amongst innovators, influencers, potential partners and customers.

Stay informed

- ▶ Receive timely policy and regulatory updates from our team of energy experts, along with market insights and email newsletters
- ▶ Attend our Working Groups addressing the latest issues affecting the sector: Markets and Revenues; Supply Chains and Fire Safety; Grid Connections; Innovation and Technology; ESO Markets Meeting.

Join us www.regen.co.uk/the-electricity-storage-network/ Or contact Olly at ofrankland@regen.co.uk

The ESN is managed by Regen, the centre of energy expertise with a mission to transform the energy system for a zero carbon future. Membership of the ESN includes membership of Regen.
