

Our business planning process

- We are preparing for our next business plan, which will run from **1 April 2023 – 31 March 2028** supporting the transition to a low carbon future across our region.
- We want to make sure everyone's feedback is taken into account as we develop our future plans. **Now is a key time for engagement, challenge and feedback.**

Setting out our approach in Emerging Thinking

We have published our **Emerging Thinking**, outlining our approach to planning for 2023-28 and how we can play a role in a **green recovery, economic growth** and power communities across the North East, Yorkshire, and northern Lincolnshire from 2023 and beyond.

We are actively seeking feedback on the ideas we have outlined to help shape our final plan.

[Emerging Thinking for 2023-2038](#)

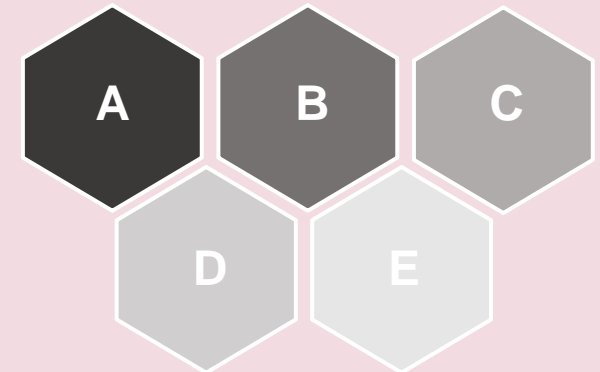

Emerging Thinking

Our **Emerging Thinking** document summarises what we have heard to date and sets out ambitions for our business plan including how we can play a role in enabling decarbonisation, supporting economic growth and a green recovery and empowering communities across our two regions. It is a platform for further and more detailed engagement with our stakeholders.

To make it digestible, we're breaking things down into **12 performance areas**.

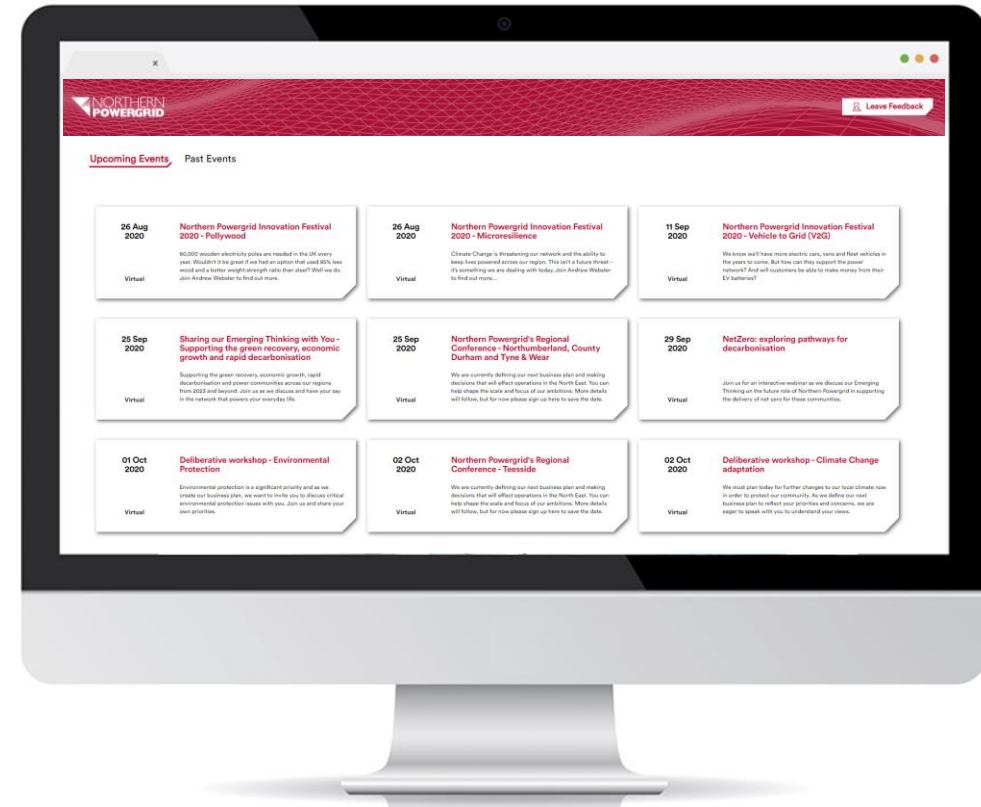

In each of those 12 areas, we've set out **five calibrated, achievable levels of service – A, B, C, D and E**. Each level outlines ways in which we could achieve those goals and the associated impact on an average, domestic customer's bill.
