

Local energy insight: Review of electricity market arrangements

3 November 2022 10:00 – 11:00
Online

The government's review of electricity market arrangements (REMA) aims to ensure that GB's future energy markets can deliver net zero whilst enhancing energy security and affordability. This forum for community energy organisations and local energy stakeholders will set out the relevant aspects of REMA, including locational marginal pricing, increased and standardised PPAs, and the expansion of supplier obligations for local renewables. We will discuss how these are being considered by government, the likelihood of each being implemented, and potential impacts and opportunities for community and local energy.

10:00 Welcome from the chair

Ky Hoare, project manager, Regen

10:10 Introduction to REMA and local energy impacts

Ellie Brundrett, net zero project manager, Regen

10:20 Locational Marginal Pricing

Simon Gill, associate, Regen

10:25 Other reforms to be considered

Merlin Hyman, chief executive, Regen

10:35 Questions and discussion

10:55 Feedback and next steps

Ky Hoare, project manager, Regen

11:00 End
